Post code: 343100

Subject: Withdrawal of CTI Certification for Jiangxi Ark Fluid Science Technology Co., Ltd.
FBFJ Series Product Line:

Gentlemen:

Referencing the initial CTI Certification Withdrawal notice dated September 3, 2021, the listed violations of CTI Certification Standard STD-201OM(19) have not been resolved by Jiangxi Ark Fluid Science Technology Co., Ltd. Further, the twenty (20) working day notification period has now expired, and no appeal has been filed with the CTI Board of Directors. Therefore, the CTI Certifications for the Jiangxi Ark Fluid Science Technology Co., Ltd. FBFJ Series closed-circuit cooling tower line is withdrawn.

At this time you must immediately:

- a) cease using the CTI Certification Labels on models of the decertified lines;
- b) send written notification to all customers who purchased models of the lines while certified, but that have not been shipped by the date of withdrawal to notify them about the change in certification status; And,
- c) remove all reference to certification from the product brochures, published ratings, websites and other materials that pertain to the decertified lines.

Please review Section 8.7 and 8.8 of STD-201OM(19) for the remaining actions and notifications relative to withdrawal of CTI certification.

After a revocation period not to exceed one year, Jiangxi Ark Fluid Science Technology Co., Ltd. may reapply for CTI certification of your product line. However, the unresolved violations of the standard will have to be remedied (e.g. completion of overdue annual testing requirements) in order for the certifications to be reinstated.

If there are any questions regarding this letter or about the application of the STD-201 standard requirements, please contact me or Frank Michell (Board Liaison to the Certification Program Committee).

Sincerely,

Michael Womack, P.E.
CTI Thermal Certification Administrator
